PROFESSIONAL EXPERIENCE

Capgemini   November 2013 – Till Date

Coxone

    Coxone is an O365 app which is a SharePoint online environment. I am working as a SharePoint Online UI Designer, Created custom responsive MasterPages from Seattle and PageLayouts using bootstrap as per style guide and Irise Mockups provided by client. PageLayouts created first for mobile devices and later for desktops since we got different layout for desktop and Mobile devices using push/pull and flexbox. Good Knowledge in Configuring (CEWP/CSWP/SEWP) web part, worked in site settings and site contents.

    Worked in site collection architecture, including use of content types and site columns. Design visual mockups; produce graphic assets and prototypes for quick buy off of user interface concepts. Develop content pages utilizing SharePoint features, HTML, CSS and JQuery. Build new Responsive master pages and page layouts to meet requirements and constraints. Test and validate solutions while actively communicating issues and risks. Configure workflows to automate business processes. Produce training materials and provide training to groups and individuals.

Environment: SharePoint Online 2013, Notepad++ and Visual Studio 2015

AOSMO Command Center

AO-SMO is an internal project managing Service Management Office for the accounts supported by Capgemini. The Command Center application is currently designed to support standard types of AM contractual and operational performance reporting for the accounts supported by Capgemini.

It delivers data in a presentable and accessible manner as web pages. It utilizes internet technologies and browser software to distribute rich, interactive reports and applications. The Command Center reporting tools bring leading-edge internet technologies together, allowing users to quickly access information efficiently.

The Command Center application can be used by any Capgemini employee and it is recommended that you use Internet Explorer 8 and above. The user can also access the application on Google Chrome, Firefox, cell phones, iPods and tablets that support HTML5 and above. With the data extract the application can pick-up data, organize data in the Dashboard, create reports Bar charts, Gauges, Tables, Analysis Grids with full enhancements. I have worked in Development Team, Transition Team and Run/Delivery Team.

Environment: Logi Info Studio Tool using XML, HTML, CSS and JQuery
